INFRA STRUCTURE:

- **Smart class rooms with Wi-Fi campus -** City Pride School has state of art classrooms equipped with LCD projectors and Computers in each class. The entire school is Wi-fi connected with internet connectivity available even in the classrooms. Teachers regularly use Computers for teaching, learning and evaluation process. The school has implemented ERP system for effective learning management system

The school has installed CCTV camera on all the school gates and also GPS systems in school bus for security.

<u>Computer Lab: -</u> The computer lab plays a vital role in equipping students with the necessary digital skills and knowledge to succeed in their academic and professional endeavors. The computer lab has contributed to enhanced academic performance, particularly in subjects requiring digital tools and resources. The lab aims to optimize resource allocation to cater to the growing demand for computer access. Commitment to Continuous Growth. Students have developed innovative projects, such as mobile applications, educational games, and web-based tools. The

institution remains dedicated to maintaining and improving the computer lab to ensure students have access to the latest technology and resources for their learning and development.

Robotics Labs:-

Robotics Labs provide an ideal environment for students to apply Science, technology, engineering, and mathematics (STEM) concepts in a practical and meaningful way. Through building and programming robots, students can directly observe how these concepts come to life. Students gain a deeper understanding of scientific principles, develop problem solving skills, and enhance their critical thinking abilities. This practical application of STEM concepts fosters a deeper engagement and enthusiasm for learning, ultimately preparing students for the challenges of the 21st century. It serves as a gateway to various industries, including manufacturing, healthcare, agriculture, and automation. By introducing robotics in education early students gain exposure to these industries and understand the potential career paths available to them.

ARTIFICIAL INTELLIGENCE :-

- AI in work education helps students with personalized learning, hands-on training, career readiness, problem-solving skills, and efficient access to knowledge.
- It prepares them for future job markets by integrating technology into practical skill development.
- AI has 5 Modules in a year, including both theory and practical.

FASHION DESIGNING INFRASTRUCTURE REPORT

The beautiful infrastructure of the lab helps us in conducting the classes very smoothly and effectively. In FD students learn machine practice, similarly they learn taking measurement, marking, paper drafting, fabric drafting, cutting, neck finishing etc. till the final product stitching, along with the drapery maintenance. The various files maintained are as follows:

1) Evaluation sheet: - Monthly, half-yearly and yearly marks of students.
2) Stock register: - Deadstock material entry.
3) Drapery register: - Maintained drapery stock, collected and submitted dates by staff.

Facilities:

*** Availability of furniture: -**

Wardrobe (10), Blackboard (1), Softboard (2), Tables (4), Hangers (36), Hanging bar (1), Clock (1).

6) A carry bag organizer is also a creative and useful activity.
7) Clutch from Khaan fabric, Fabric keychain and Handkerchief embroidery to develop stitching skills.
10) String art: - creative activity to develop skill, hand and eye coordination.
11) Portfolio: - Students maintain all their material in a folder.
12) Field visit to garment factory for specifically grade 8^{th}.

- **Creativity Lab** - We at school are introducing experiential learning program which revolves round STEAM - skills of Science Technology, Engineering, Art and Mathematics. These skills help in developing problem solving and critical analysis and prepare students to think out of box so that students can apply knowledge to solve real life problems. A special lab with manipulates has been made available for children wherein they design different structures. Students work in groups and do their presentations. impact of mathematical concepts, the school has developed a well-equipped Maths lab.
- **Maths Lab**- To explore mathematical concepts in practical manner and create visual students of class I-VII can visit regularly and learn Maths enthusiastically.

- **Science Lab & Discovery Lab** - Managing a science lab for students in grades 1 to 8 involves creating a safe, engaging, and educational environment where young learners can explore scientific concepts through hands-on experiences. Safety is paramount, with age-appropriate guidelines and supervision ensuring a secure setting. Activities are tailored to each grade's developmental level, starting with simple experiments for younger students and gradually increasing complexity as they progress. Hands-on learning is emphasized to encourage curiosity and exploration, with students actively participating in experiments and drawing conclusions from their observations. Along with this school has developed "Discovery lab" with guidance from Gakken Science Academy Japan. These labs develop little scientists and help to teach scientific principles in the most amazing way.

- **Library:** - This report provides a comprehensive overview of the library infrastructure, resources, and activities offered. It highlights the various aspects that contribute to a stimulating and engaging learning environment for students.

Furniture: The library is well-equipped with furniture such as cupboards, chairs, tables, bulletin boards (both cork and digital options can be mentioned), and a wall clock.
Consider specifying the number of furniture items to provide a clearer picture of capacity.

Technology:

The library incorporates computers with printers and barcode scanners for efficient management and access to information.
Mentioning internet connectivity would be beneficial if available.

Book Storage:

The report details the presence of book racks and magazine racks for organized storage of physical resources.
Specifying the capacity of these racks would be helpful.

Library Collection: Total Books - 8825

Book Categories:

The library offers a diverse collection of fiction (story books, novels, dramas) and non-fiction (biographies, autobiographies, general knowledge, sports) books.
Include the availability of audiobooks, e-books, or other multimedia resources if applicable.

Reference Section:

The library provides a dedicated reference section with books on history, geography, science, and mathematics.
Mentioning the availability of online databases or subscriptions to academic journals would enhance the report.

Library Activities:

The report outlines the integration of library periods into the school schedule, with batches of 20 students attending at a time.

Activity Integration:

The library actively promotes reading by conducting engaging activities based on issued books.Provide specific examples of these activities, such as story narration competitions, drawing and storytelling exercises, vocabulary games, book summaries, group discussions based on G.K. books, character

illustration activities, and creative writing prompts.

Student Donations:

The report highlights the positive initiative of students donating books on their birthdays, promoting a sense of community and ownership.

Library Management Record Keeping:

The library maintains meticulous documentation through accession registers, student and teacher borrowing cards, bill files for books and other expenses, past question papers, avid reader records, and more.

Avid Reader Program:

The library offers an "Avid Reader" program to incentivize reading.

Elaborate on the program's benefits, such as borrowing two books instead of one, exchanging books during lunch breaks, and access to author sessions.

Book Suggestions:

The library encourages student feedback by allowing both Avid Readers and other students to suggest book purchases. But only Avid reader's name is mentioned on the suggested book. Mentioning the selection process for suggested books would add transparency.

- **Restorative Sessions**

Math:- The objective of restorative session is to give additional help to learners who have fallen behind the rest in any topic or concept. Remedial classes were started from 25th August 2023 on every working Saturday for subject Mathematics from Grade 4 to 8.Timing - One and a half hour.

The students were selected on the basis of analysis of PT 1 exam , who scored E grade.

The statergies used for their improvement were:

1. Teacher firstly had a conversation with the students individually where they face difficulty in Math to strengthen their directions to meet the child's special needs .
2. Teacher identified the skills or concepts needed to be improved of the child .
3. Connecting to what they have already learned.
4. Teaching students how to identify word problem types based on their structure.

5.Giving precise instructions
6. Scaffolding instruction so students have a chance to practice their emerging math skills and gradually solve whole problems
7. Encouraging students to verbally describe their strategy and rationale when solving a problem
8. Teachers gave extra practice sums to solve .
9. Extra worksheets were also given.10. Providing students with an accurate visual depiction of a math problem's quantities and relationships.
11. Frequent assessments.
12. Parental involvement.

Improvements done by the students:

1. Students were more successful at solving word problems when they identify word problem types than when they learn to only identify keywords in the problem.
2. They showed improvement than the PT 1 exam .
3. The statergies used were highly effective.
4. It helped the children to understand that Math is not a difficult subject.

English:- The objective of the English restorative classes was to provide additional support and instruction to students who were struggling with various aspects of the English language, including reading, writing, grammar, and comprehension.
These classes started after the analysis of PT1 English. Students scoring grades lower than 'D' were enrolled for these classes. These classes were conducted on working Saturdays for one hour. The curriculum was tailored to address the specific needs of the students, focusing on areas such as:1. Reading comprehension: Strategies to improve understanding of texts, including identifying main ideas, making inferences, and understanding vocabulary in context.
2. Grammar: Review of basic grammar rules and common errors, with exercises and drills to reinforce learning.
Overall, the English remedial classes were successful in helping students make significant progress in their language skills. Many students showed improvement in reading comprehension, grammar accuracy, and confidence in oral communication.

Education at CPS

- **Activity Based Education:**

  Education at City Pride School is based on project approach with exposure through field visits, research projects, science workshops and presentations. The Continuous and comprehensive evaluation pattern [C.C.E.] is followed meticulously in the school.

  The education system in our school aims at helping students in understanding the facts by working hands-on, applying simpler & investigative learning way so as to arouse interest & develop better understanding in their subject. The newly set up discovery science lab on the principles of GAKKEN education system in Japan is an appropriate example of learning science through nature.

- **Skill Development Approach**

  From standard 6th onwards the school provides soft skill training to students to enhance their creativity, innovation, thinking, and problem-solving, communication skills, social & emotional learning along with essential life skills for building their confidence and leadership skills. The innovative programs make the children ready for 'out-of box' thinking and also helps in developing their all-round personalities.

- **Bridging the gap with parents**

  We believe that parents and school are integral part of child's life and they need to work together for optimum development of the child. City Pride is blessed with most cooperative and enthusiastic parents who believe in basic philosophy of our school. Through the programme "Connect to Inspire" school has encouraged parents to actively participate in various activities of the school and this platform would enable parents to get strongly connected to the school.

Innovative Activities

- **Social Connect**

City Pride School emphasizes on the overall development of the students by motivating and polishing their skills and improvising their areas of talents. We also work on social development of our children by engaging them in practical activities done for society. The encouragement by the school and the enthusiasm by the students is a perfect combination which helps students to explore and express themselves and to realize the real life situations. The various activities done by the school for the same are:
